

Inspiring sustainable futures in cocoa supply chains and landscapes through science, education and implementation

Trade-related policy levers to foster biodiversity abroad (component of BIO-TRADE project)

Goal Analyse how EU/EFTA states can differentiate between products based on their biodiversity footprint in a fair, proportionate, and context-sensitive manner. This must be consistent with the states' international obligations to incorporate biodiversity protection in their trade relations.

Keywords biodiversity, deforestation, trade, investment, no net loss policies, supply chains, commodities

Countries EU, Switzerland, major tropical forest-risk countries

Timeline 2022-2024
